Xpert Champs — AI Engineering Internship Policy (Version 1.0)

Document ID: XC-INT-2025-V1 | **Effective Date:** January 15, 2025 | **Department:** AI & Machine Learning Division

1. Program Overview & Objectives

The Xpert Champs AI Engineering Internship is a structured training and project development program designed to provide university students and recent graduates with practical hands-on experience building Generative AI and Large Language Model (LLM) applications using Python. Note that this is a free, unpaid educational internship program.

2. Eligibility Criteria & Duration

- **Eligible Candidates:** Final-year undergraduate students in Computer Science or Data Science with a minimum CGPA of 7.0.
- **Standard Project Duration:** 1 week (7 calendar days) from the project assignment date.
- **Submission Deadline:** October 23, 2026 at 11:59 PM IST.
- **Attendance & Check-ins:** Interns must attend 2 mandatory live review sessions per week via Google Meet.

3. Technical & Deliverable Requirements

Each intern is required to complete the assigned AI Document Comparison Assistant application and submit their deliverables through the official internship portal. All projects must strictly use Python 3.10+, Streamlit for the web interface, and `pypdf` for PDF text extraction.

Requirement Category	Version 1.0 Specification	Verification Method
Primary LLM API	OpenAI GPT-3.5 Turbo or Gemini 1.5 Flash	Source code inspection in `comparison.py`
Maximum Input Size	Up to 50,000 characters per PDF document	Automated input validation test
Report Export Format	Plain Text (.txt) or PDF report	Download button test in Streamlit UI
Submission Package	Project ZIP archive uploaded to portal only	Portal upload verification
Certification Fee	INR 0 (Free completion certificate)	Issued upon passing final viva

4. Evaluation & Final Viva Guidelines

Intern submissions are evaluated on modular code organization, graceful error handling for invalid or empty PDFs, and strict adherence to evidence-based prompting. During the final viva, candidates must explain their PDF text extraction pipeline, prompt structure, and error handling logic. Late submissions after October 23, 2026 will not be accepted under Version 1.0 rules.
